

WINE LIST

ORGANIC, BIODYNAMIC *and* NATURAL WINES
sourced from THE COASTLINES of EUROPE

Every single wine on our list is grown organically, and many of them biodynamically. They are all produced in a more natural and sustainable way than conventional wines, with the use of natural yeasts, minimal intervention in the cellar and no artificial additives.

~~~~~

They are also chosen for their sense of place, all being grown close to the coastlines of Europe, giving them a touch of seaside breeze and salinity that perfectly matches our menus and our mood. We've made a little exception for fizz, because sometimes everyone needs a bit of Champagne.
